

MC Pod

MC GROUP

is one of the largest independent quarry operators in Ireland and one of the leading suppliers of ready-mix concrete, tarmac, asphalt, precast and general quarry products in the southwest of Ireland since 1994. MC Group is also the manufacturer of the "Thermohouse low energy building system".

MC Group's latest innovation is the MC Pod

- The **MC Pod** is a prefabricated bathroom pod which is manufactured to completion at our state of the art factory in Killarney, Co. Kerry, Ireland.
- It is constructed from lightweight concrete which is CE marked and in complete accordance with all national and European regulations. The pod is fitted with all the required plumbing and electrical installations, bathroom accessories and completely tiled allowing for immediate delivery and connection to site services.
- Our bathrooms are custom-manufactured to meet your specifications and requirements. In this process there are no limits imposed on planning and design flexibility. You can freely select the size and shape of the bathroom, as well as the fixtures, fittings and furnishings.
- The **MC Pod** is suitable for multiple accommodation types including private dwellings, hotels, medical institutions, community care centres, apartment blocks, student accommodation complexes etc.

Coolcaslagh, Killarney, Co. Kerry, Ireland.

Benefits of MC Pod

- Constructed from lightweight reinforced waterproof concrete (CE Marked) with a density less than 1300 kg/m³.
- Using MC group's lightweight concrete pod the walls, floor and ceiling thickness can be reduced to 50mm, greatly surpassing conventional construction methods and other light weight concrete products. This keeps the weight of the pod to a minimum without compromising its strength while maximizing living space.
- Complies with all national and European building regulations.
- Provides excellent fire (A1) rating.
- Upon completion, you can expect immediate delivery to site.
- Built to designers requirements.
- The pods are finished to the client's individual specification.
- Reduction in construction costs and construction time.
- Significant reduction in construction site management.
